Flexible, Soon-to-be Computer Science graduate eager to continue exploring the inspiring fields of innovation. Excellent in working with others to achieve a certain objective on time and with excellence. Looking for a role where I can grow and learn from experienced team members.

EDUCATION

AUGUST 2023

BE, P.D.A. COLLEGE OF ENGINEERING,KALBURGI

I am currently in 4th Year of my Bachelors Degree pursuing Computer Science Engineering. I have maintained an aggregate of 8.0 CGPA till now.

PROJECTS

ANTI SLEEP ALARM FOR DRIVERS

We Customized a pair of glasses with IR sensors attached to it. The IR sensors senses the eyes blink and if the driver closes his eyes for more than 5 seconds then the car will slow down and eventually stop.

HOME AUTOMATION USING ALEXA

We used Amazon's voice assistant Alexa in order to automate the house in an attempt to control all the house's gadgets via voice commands.

PREDICTING HEART DISEASES

In this project we took the Cleveland Heart Disease dataset obtained from UCI repository and applied pre-processing to drop the data with missing values and applied some algorithm like Decision tree, K-Nearest Neighbor, Support Vector Machines and, Random Forest libraries.

SKILLS

- C++
- IOT
- Front End Development
- Python
- Machine Learning

AWARDS

- I bagged 2nd prize with my friends at KNEW-2021 National Level Technical Symposium for our projects.
